ABOUT US

Sayin Industry Corporation quarter century of experience in Turkey and the world has been involved in many projects with many well-known companies.

Our company, which is aiming to grow with changing and constantly renewing technology, has accomplished great success by using its dynamic and experience in its overseas projects.

ABOUT US

In terms of work experience and profitability to be among the leading companies in the industrial sector, to reach this prestige and to improve it, to produce an added value and service that enhances the quality of life.

Sayin Industry Corporation is the company which accepts the primary duty of the studies and activities that aim to be permanent in this sector in accordance with its vision, carrying professional responsibility in producing services based on engineering science.

Sayin Industry Corporation protects and develops the economic, professional, administrative and social rights and interests of its employees.

The goal of **Sayin Industry Corporation** is to and maintain a corporate structure that pays taxes, creates employment, brings investments to the economy, has a serious organization, machine park and financing structure.

VISION

To make sustainable contributions in all areas of life while focusing on entrepreneurship, innovation and reliability in our business line.

MISSION

To be included among the most successful groups nationally. By creating added value for humanity and economy, while respecting the environment and our competitors and having an entrepreneurial and leading spirit, and meanwhile, making contributions to the welfare of our country and of the geographical areas we operate in.

ENGINEERING and PRODUCTION PROCESS

Strong Engineering Solutions, Solid Structures

Our Engineering Department is the foundation of our projects, delivering innovative and sustainable solutions with a focus on quality, safety, and efficiency.

Our Services

- *Structural engineering & design,*
- *Geotechnical analysis & soil investigation,*
- *MEP (Mechanical, Electrical, Plumbing) engineering,*
- *Project management & technical consultancy,*
- *BIM & digital engineering solutions.*

We prioritize sustainability, leveraging advanced technologies to create durable, eco-friendly structures that exceed expectations.

ENGINEERING and PRODUCTION PROCESS

Our Approach

Innovation-Driven Design: Utilizing cutting-edge tools, automation, and AI-powered analytics for precision and efficiency.

Sustainability Commitment: Implementing eco-friendly materials and energy-efficient systems to reduce environmental impact.
Collaborative Engineering: Partnering with architects and project managers for seamless execution.

Risk Management & Compliance: Adhering to industry standards and regulations to ensure safety and durability.

With a future-focused vision, we continuously explore new technologies to shape the construction industry.

We don't just build structures, we engineer solutions for a better tomorrow.

ENGINEERING and PRODUCTION PROCESS

At **Sayin Industry Corporation**, we ensure excellence through a structured and efficient production process, prioritizing quality, safety, and sustainability.

Planning & Design

We collaborate with architects, engineers, and stakeholders to develop detailed, regulation-compliant blueprints that align with client visions.

ENGINEERING and PRODUCTION PROCESS

Procurement & Material Selection

High-quality materials are sourced from trusted suppliers, ensuring durability, efficiency, and environmental compliance.

Site Preparation & Foundation Work

Comprehensive site assessments, excavation, and grading establish a solid foundation for structural integrity.

Structural Construction

Utilizing advanced techniques, our teams ensure precision, safety, and compliance with global building standards.

Mechanical, Electrical & Plumbing (MEP) Installation

We integrate energy-efficient electrical, plumbing, and HVAC systems for seamless operation.

Interior & Exterior Finishing

Aesthetic and functional enhancements, including flooring, insulation, and façade treatments, complete the structure.

Quality Control & Inspection

Rigorous inspections at every stage guarantee compliance and performance. Final assessments, documentation, and support ensure smooth client transition.

At **Sayin Industry Corporation**, our process is driven by excellence, innovation, and sustainability to exceed expectations in every project.

MANUFACTURING

Research & Development
Material Sourcing & Procurement
Precision Manufacturing & Fabrication
Quality Assurance & Testing
Logistics & Supply Chain Management
Sustainable Practices
Customization & Innovation
Final Inspection & Deployment

MANUFACTURING

At **Sayin Industry Corporation**, we follow an innovative and efficient manufacturing process, integrating advanced technology, precision engineering, and strict quality control to ensure excellence.

Research & Development

We continuously explore new materials and technologies to enhance efficiency and sustainability.

Material Sourcing & Procurement

Premium raw materials are sourced from trusted suppliers, prioritizing durability, cost-effectiveness, and environmental compliance.

Precision Manufacturing & Fabrication

Using advanced machinery and automation, we ensure high-precision fabrication with minimal waste and maximum structural integrity.

Quality Assurance & Testing

Every component undergoes rigorous testing to meet international safety and durability standards.

MANUFACTURING

Logistics & Supply Chain Management

An optimized logistics system ensures timely material delivery and efficient inventory management.

Sustainable Practices

We integrate eco-friendly production methods, waste reduction, and energy efficiency to minimize environmental impact.

Customization & Innovation

Our flexible manufacturing solutions allow for tailored structural components that align with specific project needs.

Final Inspection & Deployment

Before deployment, all components undergo strict quality checks to ensure seamless integration into construction projects.

At **Sayin Industry Corporation**, our commitment to innovation and excellence sets new industry benchmarks in manufacturing and construction solutions.

CONSTRUCTION and ERECTION

*Construction
Erection*

CONSTRUCTION and ERECTION

At **Sayin Industry Corporation**, we deliver high-quality construction and erection services, ensuring excellence at every stage of the project lifecycle.

Construction Services

We build safe, sustainable, and efficient structures, managing projects from planning to handover with advanced technology and best practices.

Our construction services include:

- Civil and structural works
- Industrial & commercial buildings
- Infrastructure development
- Turnkey construction solutions
- Renovation & expansion projects

CONSTRUCTION and ERECTION

Erection Services

We specialize in steel structure installation, heavy machinery erection, and industrial facility setup, prioritizing precision and safety.

Our erection services include:

- Steel structure fabrication & installation
- Mechanical & electrical system integration
- Heavy lifting & rigging operations
- Pipeline & equipment erection
- Maintenance & support services

Commitment to Quality & Safety

We adhere to international safety standards, implement strict quality controls, and invest in continuous training to uphold industry excellence.

With a customer-focused approach and a proven track record, **Sayin Industry Corporation** remains a trusted partner, driving the future of the industry with innovation and integrity.

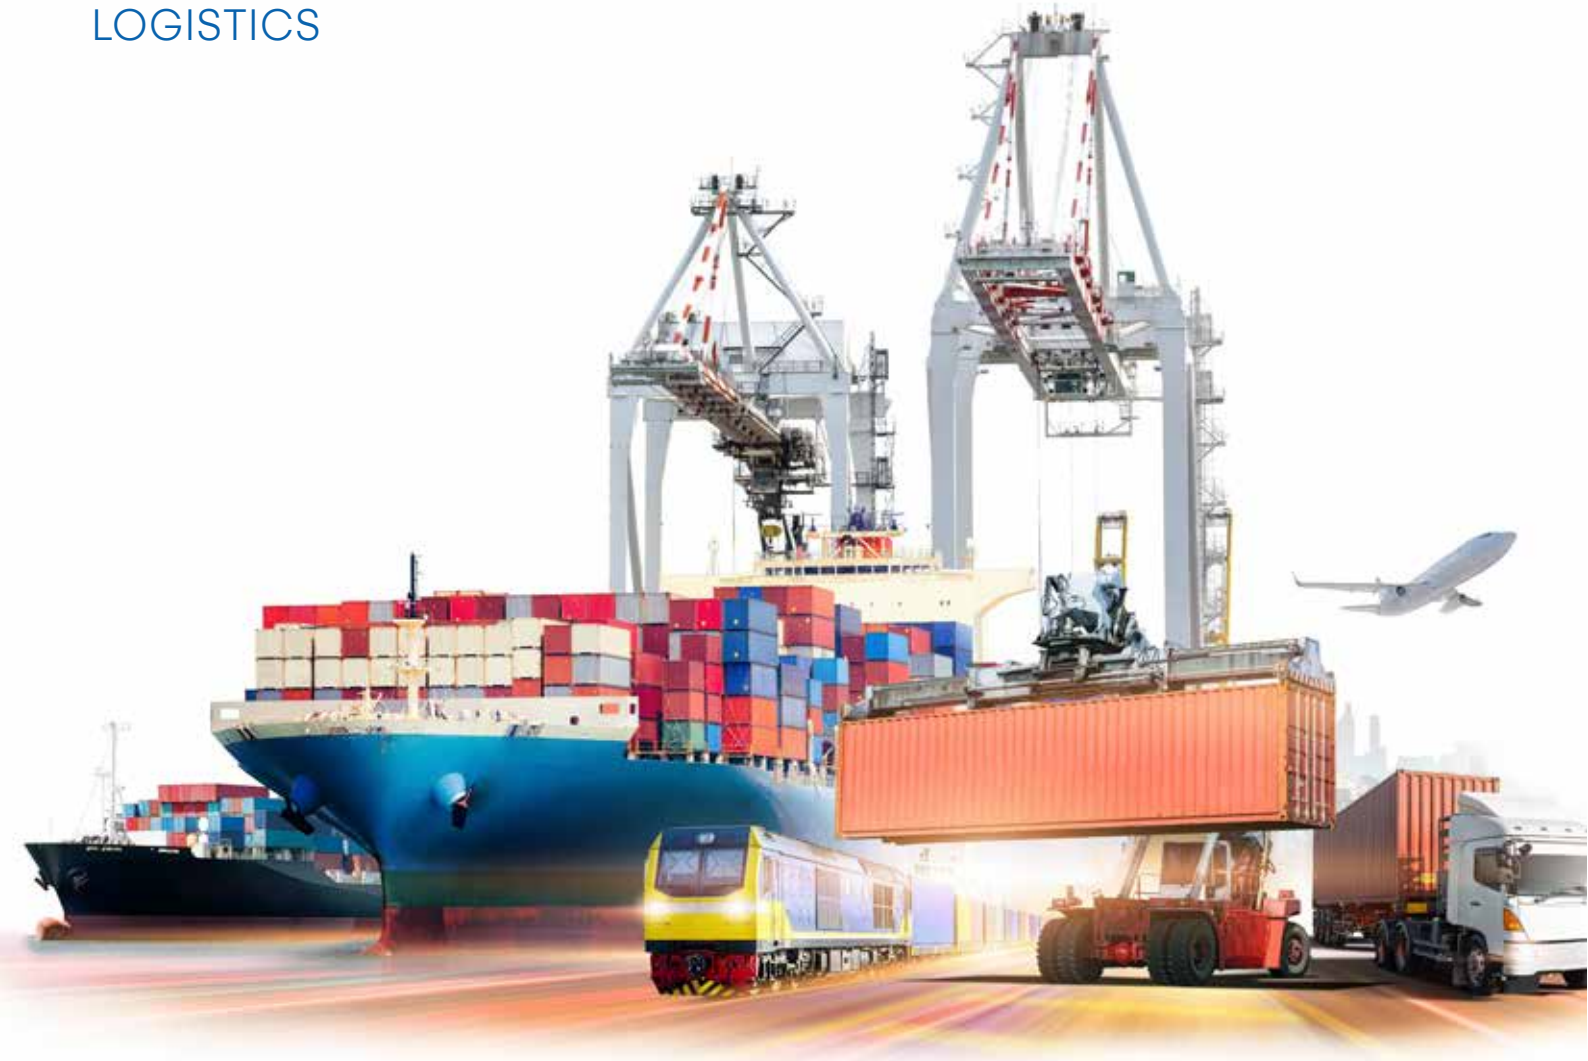

PROCUREMENT and LOGISTICS

*Procurement
Logistics*

PROCUREMENT and LOGISTICS

Productivity, Reliability, and Strategic Supply Chain Management

Our Procurement & Logistics Department ensures seamless project execution through efficient sourcing, procurement, and logistics management, securing high-quality materials while optimizing costs and timelines.

Our Key Responsibilities

Strategic Procurement: Strong supplier partnerships ensure timely delivery of quality materials.

Cost Optimization: Market insights and negotiations drive efficiency without compromising quality.

PROCUREMENT and LOGISTICS

Supply Chain Management: Continuous monitoring prevents disruptions and ensures smooth project flow.

Logistics Coordination: Efficient transportation and storage minimize delays and risks.

Sustainability & Compliance: Procurement aligns with environmental and regulatory standards.

Enhancing Project Capacity Through Smart Procurement and Logistics

With a proactive approach, we enhance efficiency, reduce risks, and ensure precision in execution. By leveraging digital tools and data-driven strategies, we optimize resources, improve transparency, and create lasting value for our stakeholders.

Our commitment to excellence in procurement and logistics makes us a trusted partner in the industrial sector.
